3. Development of energy resources in developing countries

26. The Committee considered agenda item 4 at the 9th meeting, on 17 February. It had before it the report of the Secretary-General on energy exploration and development trends in developing countries (E/1994/75) and the report of the Secretary-General (A/45/274-E/1990/73 and Corr.1), containing the outline of a programme of action for the acceleration of energy exploration and development in developing countries. Because of time constraints, the Committee was unable to complete its consideration of the item. It therefore decided to consider it at its second session, on the basis of an updated report of the Secretary-General, which would also contain an overview of renewable energy sources and environment aspects of the exploration and development of fossil fuels.
